DETAILED ACTION

- Claims 1-11 and 13-19 have been examined.

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed on 08/29/2002. It is noted, however, that applicant has not filed a certified copy of the EPO 02405735.8 application as required by 35 U.S.C. 119(b).

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

3. Claims 13-19 are objected to because of the following informalities:

- Claim 12 is missing. Claims 13-19 should be numbered 12-18.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-11 and 13-19 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2616

- In reference to claims 1, 7, and 19

Claims 1, 7, and 19 recite the limitation "the same layer" in line 11. The claim does not recite assigning frame alternation commands to a layer so the antecedent basis for the limitation is unclear.

- In reference to claims 2-6, 8-11, and 13-18

Claims 2-6, 8-11, and 13-18 are rejected as being dependent on claims 1, 7, and 19.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

7. Claim 19 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims do not specify the program of instructions on a **computer readable medium**.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are:

- Mortensen et al. (US 5481735) teaches a method for modifying packets that meet a particular criteria as the packets pass between two layers in a network.
- Hendel et al. (US 6014380) teaches a mechanism for packet field replacement in a multi-layer distributed network element.

- Kadambi et al. (US 6335935) teaches a network switching architecture with fast filtering processor.
- Sarkinen et al. (US 6904057) teaches a method and apparatus for providing multi-protocol, multi-stage, real-time frame classification.
- Paatela et al. (US 2002/0163935) teaches a system and method for providing transformation of multi-protocol packets in a data stream.
- Henderson et al. (US 2003/0231634) teaches a table driven programming system for a services processor.
- Ozguner (US 2004/0001484) teaches method and apparatus for implementing alterations on multiple concurrent frames.
- Ozguner (US 2004/0003110) teaches a method and apparatus for implementing frame header alterations.
